*Oil Spill Response Edition—1st Quarter 2008*

## Shanghai, China Celebrates the Launch of the JBF 430 Multi-Purpose Response Vessel

In February 2008, Steve Reilly visited Shanghai, China to assist in the launching of the [JBF 430/DIP 400](#) Multi Purpose Response Vessel.

This vessel is outfitted with a [DIP 400](#) Oil Skimming System (capacity 36m<sup>3</sup>/hr advancing skimmer), Dispersant Spray System (neat and diluted application), a Modular Debris Recovery System and twin 150hp engines providing 25 knot rapid response to spill site.

By design, this shallow water recovery system is ideal for working in rivers, along beaches and in inner harbors where access to spilled oil is limited.

## MK 9-24" Debris Deflection Boom

Slickbar's [Mk 9 style Debris Barrier](#) hard at work after a storm event at Dahowa Hydro facility in New York.

The Mk 9 series of Debris Barrier is designed to deflect debris out of in-take structures and protected areas by keeping it moving toward a collection area.

The MK 9 Debris Barrier is available in a variety of fabric thicknesses as well as skirt sizes extending below the water line.

## Corrosion Control International (Division of Slickbar Products Corp)

### Shell Gannett North Sea

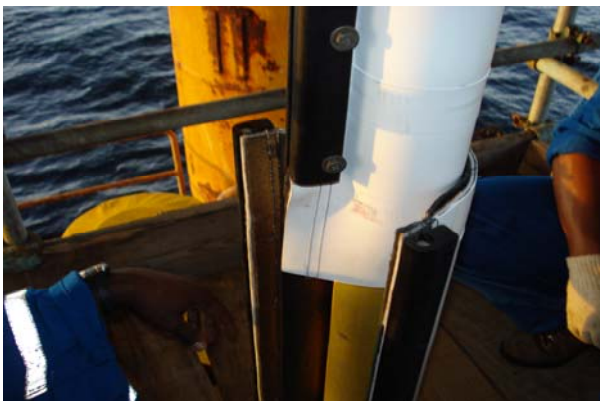

[Retrowrap SL](#) with low profile closure installed over [Oil States](#) supplied externally flush conductor connector passing through dock guide tube of Shell Gannett Platform.

For additional information on the Retrowrap SL, its advantages and various project reports throughout the world, please visit [Retrowrap SL](#).

### British Petroleum Trinidad

CCI Trinidad Representative Mr. Gregory Wilson assists in the installation of a "Special" Retrowrap designed to protect the umbilical against UV damage and to provide thermal insulation via integral polypropylene foam liner.

CCI specializes in engineering solutions to unique applications and environments.

Supplied in 3m length with integral 150mm interconnecting sealing skirt.

Completed installation looking up to underside of DW support flange

For additional information, please click on the highlighted links above, visit our website [www.corrosioncontrol.com](http://www.corrosioncontrol.com) or email our CCI Director, [Mr. Anthony Strange](#) at any time.

[Slickbar Products Corporation and its Divisions](#) sincerely "Thank you", our customers & friends for your continued support and faith in us to provide some of the most efficient and truly useful response equipment in the industry.

## Upcoming Trade Shows

Join Slickbar and our World Wide Representatives at Booth #208  
May 4 - 8, 2008  
Savannah International Trade & Convention Center  
Savannah, Georgia
