*Oil Spill Response Edition*

***Slickbar celebrates 45 years manufacturing equipment for the oil spill response industry!***

## **DBRC's JBF DIP 5000 OPENS BOW DOORS TO ATHOS 1 OIL SPILL**

[www.slickbar.com](http://www.slickbar.com)

We are very excited and pleased to release our new website!!! This has been a long time in the making. Information made available to our customers on line i.e. technical specifications & illustrations, photo reports, reference lists, etc. Information on our products and services will be just a click away!

### **Inside this issue:**

Upcoming Events	2
Comings & Goings	2
Travel & Training	2
Piscataqua River Co-Op, New Hampshire USA acquires JBF 420 Multi-Purpose Vessel & Radio Controlled SlickReel System	3
Petroleum Association of Japan acquires DIP 402	3
CISPRI acquires Slickreel	3
Piscataqua Co-op receives (2) radio controlled reels	4
US Army Hythe, UK prepares to receive SlickReel System in Kuwait	4

On Friday, the 26th of November 2004, the tanker Athos was traveling up the Delaware River to the Citgo Refinery in Paulsboro when it reportedly began leaking oil (later confirmed from two hull fractures). Delaware Bay & River Coop (DRBC) was quickly called and they immediately sent out their JBF DIP 5000, Delbay Oil Spill Recovery Vessel, which has been in operation on the river for over 30 years. "The Delbay was quickly on scene recovering oil and did a great job for us" stated Mr. Gene Johnson, president of DBRC.

There are currently five (5) JBF DIP 5000 OSRV's in service today around the world. We are also working with TWB Shipyard in Brazil building the latest one for Petrobras.

## UPCOMING EVENTS

We will have a complete DIP 420 multi purpose vessel at the IOSC in May in Miami Booth 500. Come see the latest technology upgrades and additional features.

## COMINGS AND GOINGS

Sally Hoyland, Slickbar’s customer service manager, has retired after 23 years of dedicated service with the company. Hopefully Sally & her husband George will be able to do some traveling now that there is no clock to watch. We wish Sally well and all of us here at Slickbar will miss her.

Heavy Duty Debris Barrier installed at Lake Whitney, Hamden CT to help protect their intake screens.

## TRAVEL & TRAINING

### Brazil –JBF Multi Purpose Vessel

Dan Beyer commissioned the first of seven JBF 420 multi-purpose vessels for various refineries within Petrobras. The JBF 420 was manufactured locally and outfitted with a DIP 400 oil skimming system, Fire Monitor and Debris Recovery System.

### Japan - DIP 402 VOSS Oil Skimmer

Dan Beyer commissioned the JBF DIP 402 VOSS Oil Recovery System for the Petroleum Association of Japan in Yokkaichi Prefecture. The DIP 402 skimmer is an ideal advancing skimmer for their existing vessels in severe environmental conditions.

## PISCATAQUA RIVER CO-OP DEPLOYS LATEST EQUIPMENT DURING SPILL EXERCISE

The JBF 420 Multi-Purpose Vessel equipped with the DIP 400 Oil Recovery System and Fire Monitor and the “Radio Controlled” SlickReel Boom System were unveiled at the most recent spill exercise in Portsmouth, NH. The 420 vessel and Boom Reel System are both mounted on trailers for easy transport providing the CO-OP with “rapid” response capabilities.

## JBF DIP 402 LAUNCHED IN JAPAN FOR PETROLEUM ASSOCIATION OF JAPAN

The DIP 402 VOSS Oil Skimming system is the latest equipment to be added to the Petroleum Association of Japan’s Spill Response arsenal.

## CISPRI CONDUCTS DRILL WITH UNIBAG & “NEW” SLICKREEL

Cook Inlet Spill Prevention & Response, Inc. (CISPRI) Kenai, Alaska, deploys Unitor Oil Storage bag from Slickreel System. The Reel was designed to assist in the deployment and more importantly the retrieval process during routine spill exercises. Typically, these oil storage bags are shipped and kept in a wooden or aluminum storage box making it a real nightmare to pack and unpack.

**US Army Hythe, UK**

The US Army Hythe, UK in conjunction with the US Navy in Kuwait prepare to receive a SLICKREEL Rapid Response Boom Reel Trailer System (Pictured Left). These reel systems can accommodate various quantities of deployable boom ranging in different float diameters.

These systems are also available with Slickbar's *latest* "Radio Controlled" technology complete with fully operable Level Winder systems. (Picture Right)

**Piscataqua River Co-Op, NH**

*Slickbar Products Corporation and its Divisions sincerely "thank" you, our customers for your continued support and faith in us to provide some of the most efficient and useful response equipment in the industry.*
