Wt. of Empty Box (lbs)	725	850	975	1100	1225	1350	1475	1600	875	1900	4190	6850	7200

★ It is recommended that the next length box be purchased to allow for loose packing and/or extra volume for storage of anchor assemblies, sorbents, etc.

For example: Model 6610 can theoretically store 700 feet of Mk 10 boom. However, to allow for loose packing and/or extra volume, we recommend the model 6612 Box.

★★ Special length floats are required for Mk E and Mk RB booms to achieve these totals. All other totals were calculated for booms with five foot segment lengths (or 40" for Mk 7).
